

AIM :

Update d1 and a2

ALGORITHM

```
d1 = {'a':'apple','b':'apple'}  
d2 = {'c':12,'d':25}  
d1.update(d2)  
print(d1)
```

OUTPUT

The screenshot shows a PyCharm Run window with a single tab labeled 'nnn'. The command line shows the execution of a Python script: `C:\Users\LENOVO\PycharmProjects\pythonProject\venv\Scripts\python.exe C:/Users/LENOVO/PycharmProjects/pythonProject/nnn.py`. The output of the script is displayed as a dictionary: `{'a': 'apple', 'b': 'apple', 'c': 12, 'd': 25}`. Below the output, it states 'Process finished with exit code 0'. The left sidebar of the PyCharm interface is visible, showing icons for Run, Structure, and Favorites. At the bottom right, there is a watermark that says 'Activate Windows'.
