Aim:

Length of longest word

Algorithm:

```
def long(a):
    max=len(a[0])
    temp=a[0]
    for i in a:
        if(len(i)>max):
            max=len(i)
            temp=i
        print("the word with longest length is:",temp,"and length
is",max)
a=["strawberry","orange","apple"]
long(a)
```

Output:

```
Runz
